FULFILMENT

ONGOING SUPPORT

About

Established in 1993, EFL is the UK's leading distributor for Zyxel Communications' range of connectivity solutions for Service Providers. Since the launch of ADSL wires-only, over 20 years ago, EFL has also provided the Service Provider market with a comprehensive range of automated configuration and provisioning solutions, including unique configuration, bulk firmware upgrade, TR-069 management, and a range of flexible customisation solutions.

Driven by innovation, EFL developed a pioneering automated system to simplify CPE provisioning and enabling direct fulfilment to end-customers. This streamlined workflow eliminates the need for extensive product stocks or manual device configuration, empowering service providers to focus on service delivery while optimising efficiency.
